Wonderware Information Server

Device Integration

### Device Integration

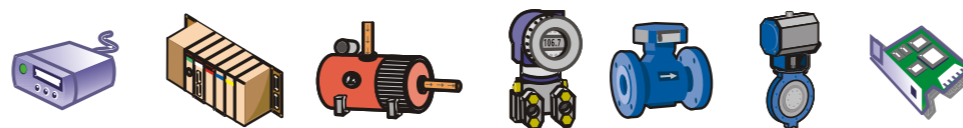

Provides hundreds of connectivity solutions to connect to a multitude of industrial devices and PLCs, and other automation systems.

Acquire

3<sup>rd</sup> Party Data Sources

3<sup>rd</sup> Party Controllers

### PLCs and Field Devices

Wonderware Application Modules provide functionality for the rapid deployment of System Platform - based solutions to meet particular customer requirements.

### Industry Application for Packaging

The Industry Application for Packaging is a pre-configured, bundled software module specifically designed for the needs of the packaging process. Line efficiencies and productivity are gained through fast, disciplined changeovers and visibility to throughput, performance, OEE, downtime & alarms.

### Corporate Energy Management Application

The Wonderware Corporate Energy Management Application helps corporations meet financial energy efficiency goals and can be applied in any business or agency that uses energy to produce their goods & services. The application is designed to address all energy types including power, water, gas, chill, air, and steam at both main and sub-meters.

### Industry Pack for Water & Wastewater

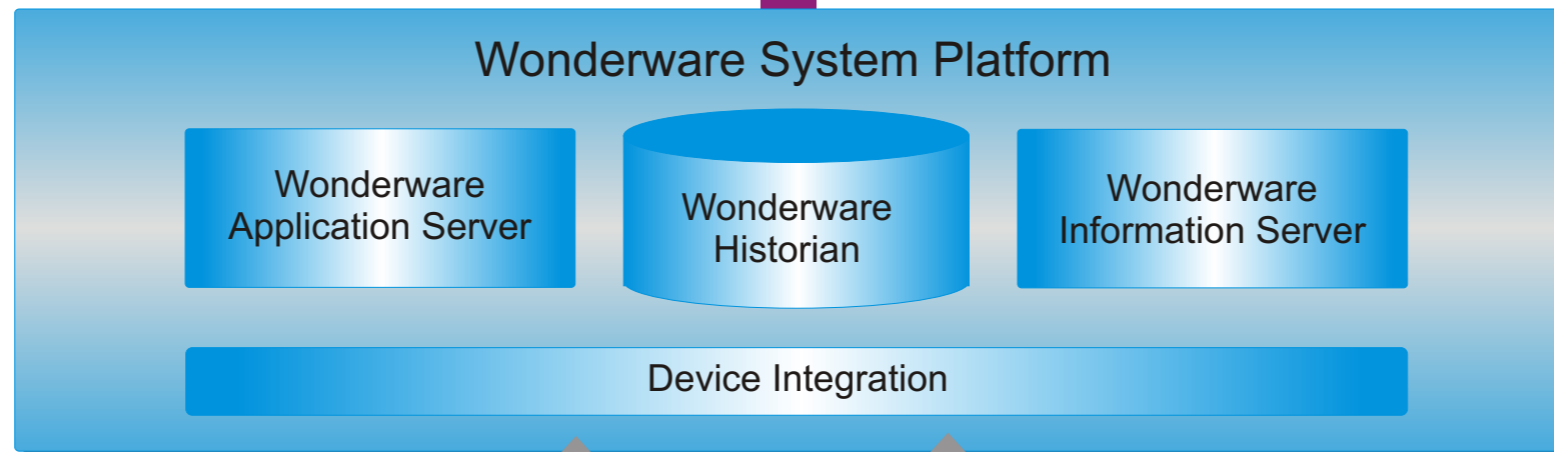

The Wonderware Industry Pack for Water & Wastewater provides an open and standardized set of components for easy and fast implementation of Supervisory Control and Data Acquisition (SCADA) systems for water and wastewater operations.

### Industry Application for Facilities Management

The Wonderware Industry Application for Facilities Management provides an open and standardized Supervisory Control and Data Acquisition (SCADA) system for facilities management solutions, able to collect and process building automation information from large distributed campuses or multiple buildings under central supervision.

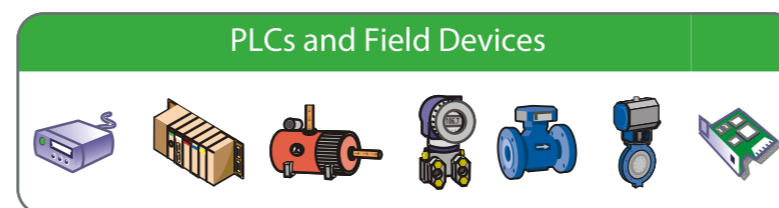

### Wonderware Well Field Application

Today's increasingly demanding upstream oil and gas operations environment requires a comprehensive, integrated solution. Invensys offers a control system built for on-shore oil and gas well field operations providing full integration of all applications across all departments and functions to create a real-time operations management environment.

3<sup>rd</sup> Party Data Sources

3<sup>rd</sup> Party Controllers

Wonderware products evolve constantly, and from time to time the actual name of the product may change, this is usually owing to enhanced features and especially where a product is now tightly integrated to System Platform.

Appropriate upgrade paths are available - contact Customer Support.
